

SAM10 AWS ARCHITECTURE DIAGRAM BLUEPRINT

Phase 1: Complete 3-Tier VPC Architecture, Network Flow, and IAM Governance

Student: Robert Angel B. Santiago

ID: 23-1360-266

Section: BSIT-4-A

Region: ap-southeast-1 (Singapore)

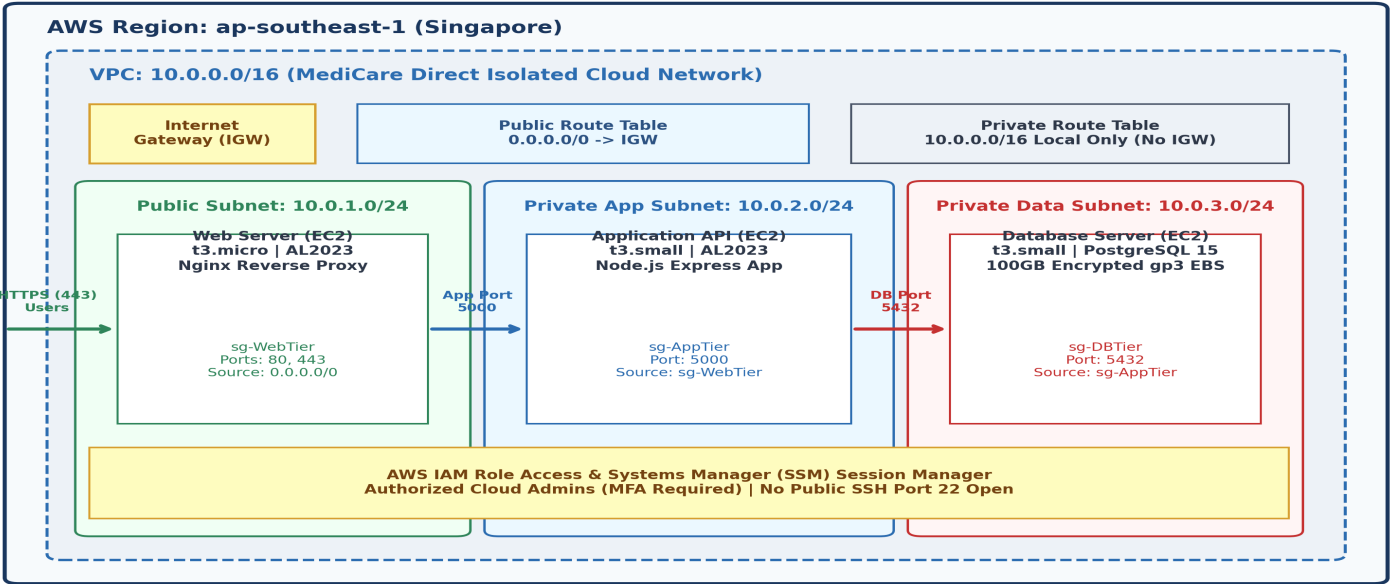

Figure 1: Complete AWS Architecture Diagram for MediCare Direct featuring VPC Subnet Segmentation, Routing, Security Groups, and IAM Governance.

ARCHITECTURE DIAGRAM COMPONENT KEY & SPECIFICATIONS

AWS Component	Subnet / CIDR	Port / Traffic Rule	Security & Access Functionality
Internet Gateway	VPC Boundary	0.0.0.0/0 External	Attaches VPC to Public Internet; default target for Public Route Table.
Public Web Tier	10.0.1.0/24 (Public)	Inbound 80, 443	Hosts Nginx web portal; routes valid requests to App Tier on Port 5000.
Private App Tier	10.0.2.0/24 (Private)	Inbound 5000 (from sg-WebTier)	Executes scheduling logic; isolated from direct Internet access.
Private Data Tier	10.0.3.0/24 (Private)	Inbound 5432 (from sg-AppTier)	Hosts PostgreSQL DB on KMS-encrypted gp3 EBS; completely isolated.
IAM & SSM Admin	AWS Identity Center	SSM Session Manager	Enforces Role-Based Access Control (RBAC) with MFA; SSH port 22 closed.
